## PROFESSIONAL EXPERIENCE

### Senior Android Developer

Instories 

05/2025 – 01/2026

Tech: Kotlin, KMP, Jetpack Compose, ExoPlayer, FFmpeg, Firebase

- Developed and maintained a high-load mobile video editor (5M+ installs) for creating short-form content (reels, stories, posts)
- Reduced Crash Rate from 0.5% to 0.3% and ANR Rate from 0.9% to 0.4%, significantly increasing crash-free and ANR-free sessions
- Increased app rating from 4.2 to 4.6 by improving performance, stability, and UX across key editor scenarios
- Contributed to Kotlin Multiplatform (KMP) codebase, delivering shared business logic and features for Android, iOS, and Web
- Identified and resolved performance bottlenecks in media-heavy features, improving editor responsiveness
- Collaborated with a team of 3 Android developers and cross-platform teams on feature design, code reviews, and release quality

### Senior Android Developer

Swapify

04/2024 – 04/2025

Tech: Kotlin, Jetpack Compose, Room, Coroutines/Flow, Firebase, Amplitude

- Built the entire Android application from scratch as a sole developer — an AI-powered face-swapping video app
- Scaled the product from 0 to 30K MAU, with organic growth from 10K to 30K MAU (3x) driven by app quality and ASO
- Maintained production stability: 0.22% crash rate, 0.44% ANR, 4.4 rating on Google Play
- Implemented intelligent caching system (Room), reducing server load by 70% and improving content loading speed
- Acted as Product Manager: defined product strategy, documented features, managed sprints, and prioritized backlog
- Conducted A/B testing on conversion and engagement — achieved +15% purchase conversion and +22% user engagement
- Integrated AI algorithms and optimized video rendering performance for face-swapping pipeline
- Advanced ExoPlayer integration: optimized video playback, reduced memory usage, and improved streaming efficiency for media-heavy content

### Middle-Senior Android Developer

Paysenger

04/2022 – 04/2024

Tech: Kotlin, Jetpack Compose, Room, Hilt/Dagger, WorkManager, Firebase

## PROFILE

Senior Android Developer | 6+ years | B2C, B2B, AI, Social, Lifestyle

- Built and scaled 4+ Android apps from scratch (0 → production), including Swapify (0 → 30K users) with 0.22% crash rate and 0.44% ANR
- Full product ownership: architecture, development, release, post-launch optimization, and Google Play metrics management
- Led Android teams (2–4 developers): code reviews, mentoring, technical interviews, task distribution, and onboarding
- Expert in Kotlin, Jetpack Compose, Coroutines/Flow, Clean Architecture (MVVM/MVI), and Kotlin Multiplatform (KMP)
- Video & media processing: ExoPlayer, FFmpeg — built high-load video editor (Instories) and AI-powered video app (Swapify)
- Data-driven product development: A/B testing, analytics (Amplitude, AppsFlyer), achieving +15% conversion and +22% engagement
- Performance optimization: Baseline Profiles, recomposition minimization, caching strategies (reduced server load by 70%)
- Cross-functional collaboration with Product, Design, Backend, and iOS teams — acted as Product Manager at Swapify
- Remote-first: proven track record in distributed international teams
- Available for relocation / remote work worldwide

## EDUCATION

### Bachelor's Degree in Business Informatics

Synergy University

09/2021 – 2025

Internationally recognized degree. Focus on IT management, business processes, and digital systems.

- Built the Paysenger social network for creators from scratch — content feed, catalog, chats, referral program, premium features (100K+ downloads)
- Led Android team of 2, managing task distribution, code reviews, and architectural decisions
- Designed app architecture using Clean Architecture, MVVM, and DI (Hilt/Dagger), ensuring scalability and maintainability
- Optimized content feed performance: reduced dropped frames from ~40/sec to ~10/sec (75% improvement) by minimizing recompositions
- Implemented Room caching layer, significantly reducing network load and speeding up content delivery
- Achieved and maintained 4.8 rating on Google Play

### Middle Android Developer

SoftJet, Moscow

07/2021 – 04/2022

Tech: Kotlin, Java, XML, Custom Views, RecyclerView

- Developed a mobile app for online learning platform with 1,000+ courses: progress tracking, lesson streaming, and course completion features
- Led a team of 2 Android developers: task distribution, code reviews, and technical mentoring
- Designed API specifications for backend team, including real-time chat functionality
- Managed direct client communication: daily standups, sprint reviews, and development planning

### Android Developer

IPartner | Binet, Moscow

09/2020 – 04/2021

Tech: Java, XML, Custom Views, RecyclerView, Maps.me , Google Maps

- Developed a business intelligence app for tracking IE/LLC data: financial metrics, real estate, and company analytics
- Maintained and improved 3 Java-based business applications, ensuring stability and performance
- Integrated Maps.me  and Mapbox: routing optimization, custom UI, and geospatial data handling
- Optimized map rendering performance by 2x, reducing load times and memory consumption
- Refactored legacy codebase, improving readability and maintainability

## LANGUAGES

### English

Upper-Intermediate (B2)

### Russian

Native

## VALUE PROPOSITION

I position myself as a product-minded Android Developer who takes ownership of app growth — not just code quality. Rather than shipping features in isolation, I actively monitor Google Play Console metrics and product analytics to pinpoint where the app is underperforming and prioritize work accordingly. This means my contributions are consistently tied to concrete outcomes: retention, conversion, ratings, or install growth. I believe organic growth is an engineering discipline, and I bring both the technical skills and the analytical mindset to pursue it systematically.

## SKILLS

### CORE

Kotlin, Java, XML, Jetpack Compose, Coroutines/Flow, Kotlin Multiplatform (KMP), WorkManager, Git

### ARCHITECTURE

Clean Architecture, MVVM, MVI, DI (Hilt / Dagger / Koin), Navigation Component, Cicerone

### MEDIA & VIDEO

ExoPlayer, FFmpeg, Video Processing, Coil, Glide, Jetpack Media3

### DATA & STORAGE

Room Database, Paging 3, DataStore, SharedPreferences, SQLite

### NETWORKING

OkHttp, Retrofit, Ktor, WebSockets

### TESTING

Unit Testing (JUnit, Mockito, MockK)  
UI Testing (Espresso, UIAutomator)  
Screenshot Testing (Paparazzi)  
Performance Testing (Android Profiler)

### FIREBASE

Crashlytics, Analytics, Remote Config, A/B Testing, Cloud Functions, Firestore, Storage, Authentication

### CI/CD & BUILD

Gradle (Kotlin DSL), GitHub Actions, GitLab Actions, R8 / ProGuard

### ANALYTICS & TRACKING

Amplitude, AppsFlyer, Google Analytics

### CS FUNDAMENTALS

Algorithms & Data Structures, System Design, OOP/ SOLID, Design Patterns, SOLID, YAGNI, DRY, KISS

### AI TOOLS & AUTOMATION

Claude Code, Cursor IDE, Prompt Engineering, MCP (Model Context Protocol), AI Agent Development, Custom Skills & Workflows, Agentic Coding, LLM Integration

### UI

Figma, Material Design 3, Material 3 Expressive

### DEVELOPMENT METHODOLOGY

Agile (Scrum, Kanban), Waterfall, Sprint Planning, Backlog Management, Code Review Process, Git Flow, Trunk-Based Development

## KEY ACHIEVEMENTS

- Scaled Swapify from 0 to 30,000 users with 0.22% crash rate and 0.44% ANR
- Reduced server load by 70% through intelligent caching system (Room)
- Increased purchase conversion by 15% and user engagement by 22% via A/B testing
- Built 3 production applications from scratch with full architecture ownership
- Led Android teams of 2-4 developers across multiple projects
